DEPARTMENT OF ZOOLOGY

NOTICE

Date: 22.05.2023

This is to inform all the students that the department of Zoology, Holy Cross College, Agartala, in collaboration with Sherlock Institute of Forensic Sciences (SIFS), Delhi, will be offering Add-on Certificate courses on:

1. Forensic Science and Crime Scene
2. Forensic Psychology
3. Forensic Graphology
4. Questioned Document and Fingerprint Examination

The interested students are hereby advised to attend an online counseling session to be organized on 27.05.2023, Saturday. The admission form for the above mentioned courses may be collected from the college office from 1st June, 2023 onwards or may be downloaded from the college website. The last date for the submission of filled in application form is 20.06.2023.

Report on online photography competition organized by the Dept. Of Zoology, Holy Cross College, Agartala.

Date: 01/03/2023

'Zoology' is the science of studies on the various wonders of the animal world. Studies on the diversity of various specimens belonging to all the major and minor phyla of the animal kingdom holds a special place in the course curriculum of Zoology as well. The plethora of varied colours and patterns found across the animal world dazzles our mind every now and then.

Collection of Zoological specimens for further studies has been a common practice among the students/scholars of Zoology. But the ever dwindling number of animals has continued to endanger the diversity across the animal world. Nowadays every little effort towards conservation of biodiversity holds a profound meaning. Henceforth, killing of animals for laboratory studies is discouraged.

But the presence of camera in the hands of most of the young generation has opened up a new avenue in method of sample collection. Now vivid photographic sampling of animals in their natural environment has become possible. Keeping all these things in mind the Dept. Of Zoology, Holy Cross College, Agartala has organized an online photography competition. Where all the students with Zoology (major) were invited to participate in the aforementioned programme. They were asked to submit one photograph per contestant for the said purpose. All photographs were to be of living Zoological specimens in an undisturbed condition in their natural habitats.

A separate Whatsapp group was created where 36 students enrolled. The participants were given a week time for the submission of the final photograph. The wonderful collection of photographs put forward by the student participants amazed the faculty members across all the departments of Holy Cross College. There were colourful photographs of butterflies (class: Insecta; order: Lepidoptera) like *Neptis hylas*, *Elymnias pealii*, *Danaus chrysippus*, *Eueides isabella* put a flutter in every viewers mind. There were also pictures of *Mastigoproctus giganteus* (The giant whip scorpion, class: Arachnida, order: Uropygi), *Musca domestica* (Housefly, class: Insecta; order: Diptera), *Locusta migratoria* (Locust, class: Insecta; order: Orthoptera). *Apis mellifer*, *Apis dorsata* (Honey bee, class: Insecta; order: Hymenoptera) were also well represented.

Among all the vivid photographs the photograph of the whip scorpion contributed by Pali Debbarma, the photo of dragon fly contributed by Baby Baul were awarded the joint first prize. The beautiful aggregation of both pupa and larvae of monarch butterfly contributed by Khakchang Tripura won him the second position. Whereas the life like representation of *Felis catus* contributed by Niharika Begum won her the third prize. But to encourage the effort of the participants every photograph was awarded the certificate of excellence.

This report is prepared by Baby Baul student of 1st semester Zoology and Dr. Subhalaxmi Bhattacharjee, Assistant Professor, Dept. Of Zoology, Holy Cross College, Agartala.

Collaborative activity/ training program on vermicomposting and vermi -culture for students and non-teaching staffs

18/05/2023

On 18th of May the students of the 4th semester Zoology (Major) went to Maya Nursery, Khowai for the field visit and gaining knowledge on practical application of vermitechnology. College bus started from the campus of Holy Cross College, Agartala around 10 am in the morning. The student group was guided by Dr. Subhalaxmi Bhattacharjee and Dr. Rumki Nath Sen.

During the journey the students observed several hilly areas which were being prepared for jhum cultivation. The bus also stopped briefly at Setacchara Tourist Park where they observed wild banana plantations which are endemic to Tripura. The bus arrived at the destination at 11:45 am.

The guide and the owner of the nursery Mr. Bijoy Gope took the students on a tour around his farm and educated them regarding the use of vermicompost for better yields.

The whole nursery was free of chemical fertilizers or pesticides. It was like a place of inhaling fresh air oxygen without having any pollutants or chemicals in it.

ating hearts and minds'

At first he guided the students to a green house where new plantations were being grown, like strawberries (*Fragaria ananassa*), mint (*Mentha sp*), coriander (*Coriandrum sativum*), wax gourd (*Benincasa hispida*) etc. After seeing that site they headed towards exploring the other sites and plantations. There they saw dragon fruit (*Hylocereus sp*) plantation by grafting method, 7-8 types of mango (*Mangifera indica*) plantation, variegated guava (*Psidium guajava*) and Indian noni (*Morinda citrifolia*), jackfruit (*Artocarpus heterophyllus*), apple mango plantation (which is most rarely found in Tripura), banana (*Musa sp*)- (C-9) plantation. Mr. Gope explained that each and every plant is being grown by using vermicompost by using the method of “vermicomposting”, not even a single pinch of fertilizer were being used for these plantations over there.

After seeing and observing all the plantations we went to the key place of that nursery – The Vermicomposting Site.

The vermicomposting site consists of three pits and the composting was already done. Sir explained us the composting process and how the earthworms (*Perionyx excavatus*) most suitable for the vermicomposting works.

Web: www.holycrosscollege.in

...ating hearts and minds

Mr. Gope explained that for vermicomposting the base of the pit is first prepared by filling it with sand and above the sand a mixture of garden waste, kitchen waste, organic waste, leaves, twigs is filled up. This is remained undisturbed for one month and allowed to decompose. During that one month water is regularly sprinkled in the pit to maintain the moisture of the prepared set up.

Then after one month the earthworms are released into the pit and they start consuming the organic waste. As result within a month or two the organic waste is transformed into vermicompost. Other factors like temperature, humidity, climatic conditions and weather also play an important role.

All the pits are shaded with a cemented ceiling to protect the earthworms from heavy rains.

There was a small channel attached to the pit. Mr. Gope told us that during the process when the pit is filled with excess amount of water that excess amount of water comes out through out that channel and this water is more beneficial and advantageous from vermicompost itself which is used in the plantations. And also the cemented walls made beside pit is a protection for the earthworms from the predators. Example – *Bandicoota sp.*

Report on One day Workshop on 'Zoonosis and Veterinary Hygiene' organized by NSS Unit, Holy Cross College, Agartala in collaboration with Dept. Of Zoology, Holy Cross College, Agartala.

Date: 19/01/2023

NSS Unit and the Dept. Of Zoology of Holy Cross College, Agartala, arranged a One day Workshop on 'Zoonosis and Veterinary Hygiene' on 18th January 2023. This program was arranged as a part of a seven day long NSS Special activity camp.

The venue of the aforesaid programme was set at the village Panchayat office of Sipai Para Village, Lefunga R.D. Block, West Tripura District, Tripura, 799210. This village was chosen because this is the adopted village of Holy Cross College, Agartala. The concept of Village Adoption entails development practice that is reflexive, and socially useful. It needs to result in improvement in the local situations, refinement of a local practice, and betterment in the conditions of living of the people of the concerned locality.

Maintaining livestock close to their home locations is a very common practise among the people of the locality. The workshop aimed to help, support and give learning on various aspects of health and hygiene of the domesticated animal population maintained by the inhabitants of this village. As a general practice, people are known to maintain a diverse population of various farm animals like pigs, poultry (chicken, ducks and pigeons), cows and goats. Regular house pets like dogs and cats were also maintained. All these animals were maintained well within the boundaries of people's homes. This ensures ample scope for the spread of various diseases from animals to humans and vice-versa (Zoonosis); if proper hygiene practices are not maintained.

Holy Cross College, Agartala, adopted Sipai Para with a mission to work along with the community at the grassroot level while enabling them to pursue and develop various positive impacts among the inhabitants of the concerned village. Through this particular workshop, the lack of awareness of various hygiene practices related to animal husbandry was addressed.

The resource person of this program was Dr. Seuli Saha Roy, Associate Professor, Department of Veterinary Public Health and Epidemiology, College of Veterinary Sciences and Animal Husbandry, R.K.Nagar, West Tripura, Tripura - 799008.

Web: www.holycrosscollege.in

Dr. Rumki Nath Sen, Head of the Department welcomed Dr. Roy at the campus of Holy Cross College at 11:00 am in the morning. From there, all the faculty members of the Department of Zoology; namely Dr. Subhalaxmi Bhattacharjee, Dr. Parichita Ray Choudhury, Dr. Anamika Bhowmik, as well as the laboratory assistant of the Department, Mr. Nantu Kar accompanied the resource person upto the venue of the programme. Mrs. Sangita Chakraborty, NSS program officer, was a part of the group as well. About 40 students of the college accompanied their teachers.

The whole team was led by the very respected Fr. Joe Paul, CSC, Vice-Principal, Holy Cross College, Agartala.

On reaching the program venue, the group met with about 20 inhabitants of the village and the Chief Guest of the programme, Mrs. Sukhini Debbarma.

There, Dr. Rumki Nath Sen and Mrs. Sangita Chakraborty felicitated the Vice-Principal of the College, Chief Guest as well as Dr. Seuli Saha Roy with flower bouquet and memento.

Dr. Rumki Nath Sen welcomed all the guests and the participants wholeheartedly. Then the Chief Guest gave a brief description about the various difficulties the local people face on a regular basis due to various diseases related to animal health. After that, Fr. Joe Paul delivered an enchanting speech enquiring about the well being of the inhabitants of the village. He encourages them to take part in the very profitable business of animal rearing. He advised them to pay proper attention to their health and hygiene as well.

After that, there was an inauguration song from Sayantika Bhattacharjee and group. A small play was performed by the students of the Department of Zoology which carried a clear message regarding the importance of maintaining proper veterinary hygiene. This very entertaining performance was followed by an elaborate lecture and a very engaging interactive session by Dr. Seuli Saha Roy.

Here she enquired from the local people about the different species of animals they domesticate. She detailed the proper measures that should be followed while making enclosures for the animals. She gave the clear idea about the food, medication and vaccination regimes that are appropriate for maintaining a healthy population of animal species. The excreta and the left over food of the animals needs to be disposed off with great care. The feed for the livestock needs to be of good quality as well. All

these measures, if followed properly, will ensure better health of both the animals and the human population. This will prevent the spread of various diseases from animals to humans and vice-versa.

At the end, Mrinalini Bhattacharjee, student of Dept. Of Zoology and a volunteer of NSS delivered a vote of thanks to all the members who arranged this program. The entire event was conducted by Debjani Bhattacharjee, student of Zoology and NSS Volunteer.

This report is prepared by Dr. Subhalaxmi Bhattacharjee, Assistant Professor, Department of Zoology, Holy Cross College, Agartala and Mr. Shwatabh Chakraborty, student of the Department of Zoology, Holy Cross College, Agartala.

Report on ' One Day Training Program On Financial Literacy' For Non- Teaching Staff of Holy Cross College, Agartala held on 25.04.2023 .

Holy Cross College, Agartala has presented itself as one of the premium educational institutes of Tripura, India. The institute provides an excellent atmosphere for the upliftment of the enrolled students, alumni, teaching faculty as well as the non-teaching staff. All of these members regularly put their strongest effort for the betterment of the facilities provided by the institution.

The development of non-teaching staff of the college has always been a concern for the authority. Keeping this in mind, A One Day Training Program On Financial Literacy for Non- Teaching Staff was organized by the Department of Zoology in collaboration with IQAC of the college. The program was held on 25.04.2023. The venue was Room number F18 of Holy Cross College, Agartala.

The resource persons of the program were Rajesh Kumar Das, Asst. Professor, Department of Commerce and Dr. Rakesh Deb Roy, Asst. Professor, Department of Business Administration. Both of them are members of the teaching faculty of Holy Cross College, Agartala.

The program started at 1:00 pm on 25.04.2023. The occasion was graced by the presence of the respected Principal of the institute, Dr. Fr. Benny K. John, IQAC coordinator of the college Dr. Sushobhan Sengupta, Dr. Sandeep Roy. The participants (44 in number) included office staff, members of the library facility, members of the transport facility as well as the caretakers of the campus.

The first lecture was delivered by Rajesh Kumar Das where he elaborated how to consciously save money in our daily life through frequent use of generic medicines, curtailing impulsive buying, saving money for childrens education. He gave special importance to maintaining a healthy daily lifestyle and thus to keep our future secure. He emphasized the various programs through which money can be saved to ensure a secure future.

The next lecture was delivered by Dr. Rakesh Deb Roy. He shared an elaborate methodology about how to keep our savings safe. He discussed the malicious ways how 'hackers' of the cyber world are on the constant lookout to empty out any unsecured bank account.

The program was conducted by Dr. Subhalaxmi Bhattacharjee, Asst. Professor, Department of Zoology and Achintya Bhattacharjee, Asst. Professor, Department of Business Administration.
